

55" Samsung Touchscreen ME46B

Product Specification

Resolution	1920x1080	HDMI	1
Refresh Rate	60 Hz	Touch Points	1
Aspect Ratio	16:9	VGA/DVI/Component	0/1/1
Weight	12.5 kg	Power Consumption	110W

Product Description

Get your message across with more ease and efficiency than ever. Your Samsung LED professional display uses LED lamps around the panel's edge, so this means the screen is thinner, uses less power and generates less heat. Installation is also much quicker and easier, thanks to its light and slim design which means it needs less support and can be carried easier. And, with a built-in media player, you can play your videos straight from USB storage. Not only that, but MagicInfo Lite software lets you schedule tasks, manage your content and set content to play automatically. Samsung Edge LED solution utilises LED lamps around the edge of the panel so the LEDs emit light on the side of the panel. This results in a much thinner screen that requires fewer lamps meaning reduced power consumption and less heat generated. You'll find the new Samsung LED LFD is lighter than previous LFD models. Yet it offers heavy weight communication solutions for any modern business looking to convey concise marketing or educational messages.

With a quick and easy installation, setting up your business LFD can be achieved in minutes and with the inimum of fuss. Its lightweight design means that it requires less support to hold it up, and can also be conveniently moved about with its easy-to-carry dimensions. The edge type design allows the unique slimness, which means less space is needed for the unit. This innovative thinking is all wrapped up in a contemporary design that will also add a touch of sophistication to your overall messaging.

Take advantage of your displays touchscreen ability by using custom, interactive content. DBpixelhouse specialise in creating bespoke touch apps that can help you attract and engage audiences at your events.
