

## 46" Samsung UE46

### Product Specification

Bracket Weight	17 kg	Power Consumption	160 W
Screen Weight	12 kg	Resolution	1920 x 1080
Distance from screen (front) to wall	122 mm	HDMI	1

### Product Description

With UEC Series displays, the thinnest video wall yet with a depth of 29.9mm (1.18in.), you don't need to clear out a large area to accommodate your video wall. These ultra-thin displays are designed to take up less space, barely protruding from the wall to blend discreetly into your business environment. The slim and light-weight design of the displays and extensive optional installation accessories such as wall brackets help make installation an easy job in even tight spaces. The unobtrusive displays also feature narrow bezels, which provide a broad viewing area on a near-seamless digital canvas.

LED and video walls are an effective way to attract interest at an event. DBpixelhouse specialise in LED walls, as well as creating state of the art content to compliment it. Take a look at our past creations in our [content library](#) or [get in touch](#) with a member of the team to start designing your unique, digital interactives.
