

DB Audio E3 Loudspeaker

Product Specification

Components	6.5" driver/1" compression driver (with constant directivity horn)	Max sound pressure - D6/D12/D80	122/123/123 dB SPL
Power consumption	120-480W	Frequency	80Hz - 18kHz
Nominal Dispersion Angle	90H x 60V	Cabinets per channel	4
Dimensions HxWxD	352x190x204mm	Weight	7.2kg

Product Description

The E3, by DB Audio, is an extremely small and versatile high performance system with astonishing sound and excellent headroom. The horn, which may be rotated to give either 90° x 60° or 60° x 90° coverage, has the necessary flexibility in directivity to enable a variety of applications such as delay, infill or distributed sound reinforcement applications. In addition, it can be used as an extremely compact stage monitor. Together with a subwoofer system the E3 is also capable of reproducing live or playback music at continuously high SPLs. The E3 cabinet is constructed from marine plywood with an impact resistant paint finish, and with its asymmetrical shape and eight M8 threaded inserts for mounting accessories the E3 can be deployed in almost any position. The loudspeaker cabinet is also available in Special Colour (SC) and Weather Resistant (WR) options.
