Product Description

The iPad Air, the name given the iPad 5, brings with it a new design that looks a lot slimmer, and feels a lot lighter, just like the iPad mini. Throw in an Apple A7 'cyclone' processor, with 64-bits of power, and an Apple M7 motion coprocessor as well. Improved LTE support, a bumped up FaceTime and iSight camera and you've got the biggest and the lightest iPad since the original.

Tablets are a unique and versatile way of attracting an audience and engaging them at any event. From augmented reality to bespoke games, we can create custom content that is sure to make an impression at your next event.
