Product Description

The iPad Pro is a computer for a new generation of users who don't know what a computer is, according to Apple's newest iPad commercial; to everyone else it's a supercharged tablet, especially for those looking to replace their aging laptop.

The iPad Pro 12.9 is one of the best ways to experience Apple's software refresh. The newly announced iOS 12 update will help even more later this year.

It has a brighter, more colorful, and extra-anti-reflecting 12.9-inch touchscreen. This display - by far the best we've seen in a tablet - is your touchscreen Mac, essentially. In case you're wondering how Apple is competing with the Microsoft Surface Pro and countless touch-friendly Windows laptops, this is how.

Tablets are a unique and versatile way of attracting an audience and engaging them at any event. From augmented reality to bespoke games, we can create custom content that is sure to make an impression at your next event.
