

Venue & Temporary Event Connectivity & Wi-Fi

Talk to Us About a Site Survey

Commission our network technicians to audit your site, design, install and run **mission critical networks** for both **temporary events** and **permanent venues**.

Our high peak load networks are specifically designed to support multiple technologies simultaneously throughout the period of your event.

A total systems approach will ensure that your **Wi-Fi, PA, telecoms, broadcasting (TV and Streaming), cashless payment systems and e-ticketing** all work simultaneously, without concern of overload.

- e-ticketing
- cashless payments
- broadcast TV, & live streams
- PA
- CCTV
- Wi-Fi

Total Systems Approach

Ensure all of your connectivity based systems are robust and efficiently managed, giving you confidence in the resilience of your commercially critical services.

High Load Resilience

Deliver a frictionless consumer experience, reduce queuing and waiting times, optimise the opportunities for ecommerce, engage consumers with brilliant close ups of the action

Permanent Venues

Invest in the best quality connectivity infrastructure to future proof your venue ready to utilise developing technologies in consumer engagement.

Outdoor Venue Extension

We specialise in historically important environmentally sensitive installations, returning green field sites to their beautiful best.
